**Data Analyst — Python — SQL — Power BI — Excel — Machine Learning — Data Visualization “**

## Professional Summary

---

Results-driven Data Analyst and aspiring Data Scientist with hands-on experience in healthcare, manufacturing, retail, and financial analytics projects. Skilled in Python, SQL, Power BI, Excel, Pandas, NumPy, Machine Learning, Data Visualization, and Exploratory Data Analysis (EDA). Experienced in building predictive models, performing statistical analysis, developing business insights, and creating data-driven solutions to improve operational efficiency and decision-making.

## Education

---

**G H Raison College of Engineering and Management, Nagpur (GHRCEMN)**

Bachelor of Computer Science

2024 – 2027

CGPA: 7.0/10

**Adarsha Vidya Mandir High School Junior College**

Higher Secondary Education

## Technical Skills

---

- **Programming Languages:** Python, SQL
- **Data Analysis:** Exploratory Data Analysis (EDA), Data Cleaning, Data Transformation, Statistical Analysis
- **Visualization BI Tools:** Power BI, Microsoft Excel, Matplotlib, Seaborn
- **Machine Learning:** Scikit-Learn, Classification Models, Predictive Analytics, SMOTE
- **Libraries:** Pandas, NumPy
- **Database:** MySQL
- **Tools:** Jupyter Notebook, Git, GitHub, VS Code

## Internship Experience

---

**Edverciity by LiveTechSkills**

Data Analytics Intern

- Worked on real-world analytics projects involving data cleaning, preprocessing, and visualization.
- Applied Python, Pandas, NumPy, and statistical analysis techniques to extract meaningful insights.
- Created visual reports and dashboards to support data-driven decision-making.
- Strengthened practical knowledge of analytics workflows and business problem solving.

## Projects

---

**Healthcare Management System**

GitHub

- Developed a healthcare management platform integrating patient records, appointment scheduling, EMR, billing, and reporting functionalities.
- Designed a multi-tier architecture for efficient healthcare data management.

- Implemented secure access control and structured healthcare information workflows.

## **Fraud Detection Analysis**

GitHub

- Built machine learning models to identify fraudulent financial transactions from highly imbalanced datasets.
- Performed data preprocessing, feature scaling, and class balancing using SMOTE.
- Evaluated model performance using Precision, Recall, F1-Score, and Confusion Matrix metrics.

## **Manufacturing Defect Analysis**

GitHub

- Conducted exploratory data analysis on manufacturing defect datasets to identify defect trends and quality issues.
- Analyzed repair costs, inspection methods, and severity distributions.
- Created visualizations to support quality improvement and operational insights.

## **Retail Sales Analysis**

GitHub

- Analyzed retail sales data to identify customer purchasing patterns and sales trends.
- Performed data cleaning, aggregation, and visualization for business reporting.
- Generated actionable insights to support sales optimization and strategic decision-making.

## **Achievements**

---

- Developed 4 end-to-end analytics projects across healthcare, retail, manufacturing, and financial domains.
- Applied machine learning and statistical analysis techniques to solve real-world business problems.
- Built dashboards and visual reports using Power BI, Excel, Matplotlib, and Seaborn.
- Maintained an active GitHub portfolio showcasing practical Data Analytics and Machine Learning projects.
